

Dual-head, HDMI®, digital video, audio, and USB2.0 over 1GbE IP network.

The ADDERLink INFINITY 2124T (ALIF2124T) is a high performance IP KVM extender that forms part of the ADDERLink INFINITY matrix solution. This enables the relocation of critical computing hardware into a secure and temperature controlled environment away from the user work station; while maintaining a pixel-perfect desktop experience.

ADDERLink® INFINITY 2124T (HDMI)

Features

Perfect Digital Video, Real-Time Control

Using a spatially-lossless encoding system, with 1:1 pixel mapping, the ALIF2124 provides pixel-perfect and color accurate video with no artifacts. The digital video received is the same as the digital video leaving the remote computer.

Standard IP Technology

Using standard IP technology allows a choice of CATx or fiber connections (1x RJ45 1GbE SFP module included). Resilience is offered by the optional 2nd network port which provides teaming facility for load balanced and critical systems.

Unlimited Extension Distances

Extension distance is not limited to a single 100 meter cable length. If you need to extend further, simply add a 1GbE network device to achieve an additional 100 meters, which can be repeated many times. Also fitted with SFP cages to accept fiber optic transceivers for much greater distances.

USB 2.0 with Class Control

Supports USB devices including graphics tablets, jog shuttles, joysticks and 3D explorers, alongside mass storage devices. For secure applications, the system can disable the use of non-HID devices, meaning there is no need to physically block USB ports to prevent the use of mass storage devices.

Flexible and Scalable Extender or Switch

Each ALIF2000 series unit can be configured as a simple extender or self-managed distributed KVM switch. Each receiver can see up to 16 sources and rapidly switch between them.

ADDERLink® INFINITY Matrix

With the addition of ADDERLink® INFINITY Management (AIM) system, you can turn multiple point-to-point extenders into a scalable digital KVM matrix system that allows any workstation to link with any computer connected to the network.

EDID Management

Intelligent EDID management allows the true characteristics of the monitor to be passed back to the computer. This ensures perfect video display without additional configuration.

Plug and Play

ADDERLink INFINITY devices are delivered in a zero config state so you can plug them in and start working on them straight away. There is no need for drivers or software to be installed.

Redundant Network Operation

The units support network teaming allowing for full network redundancy and increased resilience for mission-critical applications.

Digital Audio

The ALIF2000 series supports two channel digital audio input via USB and the digital video connector.

What's in the Box?

1x ALIF2124 Transmitter

1x SFP-CATX-RJ45: 1GbE SFP module for CATx cable

1x PSU-IEC-12VDC-1.5A: Mains power supply

2x VSCD15: 2m/6.5ft HDMI cable

1x VSC24: 2m/6.5ft USB cable

1x VSC22: 2m/6.5ft Audio cable

1x IEC PSU cable of country code
