

FireWire Transceiver

2010-03

Signal Extender

FireWire 800

The FireWire-800 Transceiver system extends signals in accordance with protocol IEEE1394b. It enables the transmission via fibre optic (2 fibres) over up to 500 m.

The system consists of two main components; the computer module (transmitter) and the user module (receiver). The modules are connected via two fibre optics.

The FireWire-800 Transceiver computer and user modules transmit bidirectional signals in accordance with protocol IEEE1394b-2002 - also downward-compatible with IEEE 1394a-2000 and -1995.

The computer and user modules are units with the same design and can be used interchangeably.

System diagram:

- 1 FireWire-800 Transceiver
- 2 Industrial camera

Example: FireWire extension from machine control stand to production line for visual process monitoring

The production line is monitored using an industrial camera. The FireWire-800 transceiver extends the camera data across a distance of 500 m via fibre optic cable to the control stand. At the control stand workplace the image data is monitored and processed by computer. The operator and computer do not need to be exposed to the production environment. The fibre optic transmission is not susceptible to interference from the environment.

Technical data		FireWire-800 Transceiver
Computer per system		1
Type of cable connection	Computer module – user module	dedicated fibre optic connection
Transmission length (max.)	Computer module – user module	500 m (50/125 µm)
Transmission cable type		2 multimode fibres (50/125 µm)
Power supply	Main Type	external power pack
	Connection	1 x hollow socket
	Power supply	+12VDC/1.0A
Casing	Material	Metal
	Dimensions	W x H x D desktop 101 x 24 x 91 mm
Weight		approx. 0.3 kg
Operating environment		
	Temperature	+0 to +50 °C
	Air humidity	< 80 %, non-condensing
Interfaces and specifications		
	for workplace	1 x bilingual socket (9)
	Computer	1 x bilingual socket (9)
	Transmission Computer module – user module	1 x LC duplex socket
	Specifications Protocols	IEEE 1394b 2002 IEEE 1394a 2000 + 1995
	Transmission rate max.	800 Mbit/s
Conformity		CE, RoHS

Order list

Art. no.	Description	
A199 0004	FireWire-800 Transceiver-Set	2 x FireWire-800 Transceiver (transmitter and receiver)

Connectivity

Computer connection cable of 0.7m in length are included.
Power supply cable and power packs are included as standard.

Art. no.	Description	Category in KVM Connectivity	Function
see KVM Connectivity	K-LwLm-LCD-x	Ready-made cable	transmission

x = length in metres, see KVM Connectivity for lengths available.
When ordering, please quote the article number and description.

A wealth of variants thanks to the modular design

A lot of G&D products are available with different equipment options. The icons below the product pictures show the equipment of the corresponding product.

Important note for KVM Extender

To ensure that the computer and workstation modules are compatible, please check that functional features (letters "ARU" as well as "M" or "S") are identical on both modules. An exception to this is the "delay" component (letter "D") at CATVision which is only used in the computer module.

Example CATVision:

CATVision-ARUD-CPU + CATVision-ARU-CON = ok
CATVision-ARUD-CPU + CATVision-U-CON = not ok

Example LwLVision:

LwLVision(S)-MC2-ARU-PC + LwLVision(S)-MC2-ARU-REM = ok
LwLVision(S)-MC2-ARU-PC + LwLVision(M)-MC2-AR-REM = not ok

ABBREVIATIONS

CPU = Computer module	M = Multimode
PC = Computer module	S = Singlemode
CON = User module	RM = For assembly in a 19" rack
REM = User module	A = Audio
MC2 = Multichannel 2	AR = Audio + RS232
MC3 = Multichannel 3	R = RS232
MC4 = Multichannel 4	U = transparent USB 1.1
	U2 = transparent USB 2.0
	D = Delay

EQUIPMENT

 = digital single-link video	 = Delay
 = digital dual link video	 = Power
 = analog video	
 = Audio	 = Desktop
 = RS232	 = Rackmount
 = FireWire-800	 = Network connection
 = USB 1.1 or 2.0	 = Web interface
