2 Port Video Matrix Switch (2-in, 4-out) VS0204

ATEN's new VS0204, Video Matrix Switch, integrates a video switch and a video splitter, and a speaker together. When the regular video splitter can only distribute a single video signal to multi-monitors and the regular video switch just shows a single video signal at one time, VS0204 allows video and audio signals from 2 separate computers to be routed to 4 monitors, projectors, and speakers independently.

À

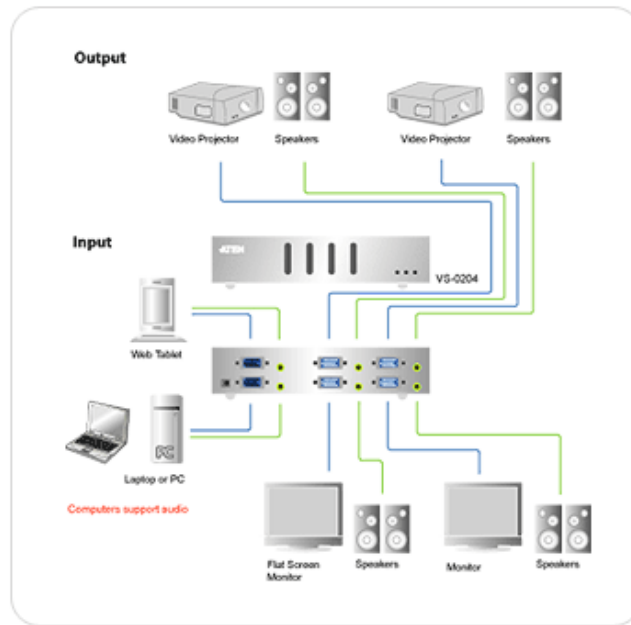

The VS0204 is also a signal booster. It allows you to extend the signal transfer distance up about 210 feet with excellent video quality. To provide more outputs, VS0204 can be cascaded itself or regular video splitters (2 levels) for various applications. VS0204 is ideal for presentations and applications where information from multiple computers is being delivered to multiple destinations.
