Video Wall Controller

MP300&MP700

INTRODUCTION

LED video walls have become increasingly popular in many applications, including concerts, live events, security monitoring centers, Olympic Games. These dynamic displays consist of multiple LED panels seamlessly tiled together managing the content, processing signals, to create a large, coordinating and synchronizing the display of images and videos across multiple LED panels.

The MP series supports DVI , HDMI, audio and Ethernet signal. The maximum loading capacity is 1920×1200@60Hz.

The MP Series communicates with PC via Type-B USB port. Multiple MP Series units can be cascaded via UART port.
